Java ⋆ rust ⋆ golang ⋆ C ⋆ ARM Embedded

Education

2015 **Diploma, Computer Programming**, *Algonquin College*

Professional Experience

Jan 2026 - Current **Sr. Software Developer**, *TrendAI (fka Trend Micro)*, Ottawa

- Implemented simulated network router for attack path evaluation
- Technologies used: golang, MySQL, Spring, AWS

Dec 2016 - Dec 2025 **Software Developer**, *Trend Micro*, Ottawa

- Maintained and enhanced SaaS product (hosted on AWS) used to manage fleets of security agents
- Implemented lock-free itemized data synchronization feature to unblock non-itemized sync
- Implemented clustered job queue and distribution using Zookeeper
- Drove cross-project dependency upgrades in a mixed-version (8/21) JVM stack, presented results to local R&D
- Implemented release pipeline for legacy on-prem product
- Implemented tooling for developers and presented to local R&D
- Technologies used: Java 8, 21, Postgres, Spring, Quarkus, Zookeeper, AWS[ec2, ecs, eks, sns, sqs, lambda]

Jan. 2015 - Aug. 2015 **Student Web Developer**, *Bank of Canada*, Ottawa

- Maintained Wordpress sites on an agile team, tracked with Jira
- Designed and implemented Wordpress plugins and a generic shortcode filter
- Wrote BDD tests with Behat
- Developed PHPUnit tests
- Technologies used: Wordpress, Behat, PHPUnit, XDebug, Jira, ant

Sept. 2014 - Dec. 2014 **Student**, *Algonquin College*, Ottawa

- Capstone course for the program, similar to ARI (projects provided by ARI in some cases such as this one)
- Researched and developed drivers for sensors on a STM32-based prototype board running Contiki
- Ported existing, client-provided HAL to standard STM32 HAL
- Ported startup code from IAR to GCC/Eclipse based on existing work
- Began work on adapting Contiki network drivers to the board's chipset
- Team lead for the project
- Technologies used: IAR, Eclipse, GCC, OpenOCD, Contiki, gdb

May. 2014 - Aug. 2014 **Research Assistant**, *ARI, Algonquin College*, Ottawa

- Researched and developed a web application for Deporte Conex `http://www.deporteconex.com`, designed to connect staff at US colleges with students outside the US
- Team lead for the project
- Used agile development methodology augmented with initial waterfall approach
- Technologies used: Ruby on Rails, Bootstrap2 HTML5, CSS, CoffeeScript

May. 2010 - Dec. 2010 **Vice President, Information Technology**, *Computer Science Student Association, University of Ottawa*, Ottawa

- Streamlined the upgrade process for several software projects in use
- Managed an Ubuntu LAMP-based server
- Technologies used: Linux, Apache, MySQL, Drupal, Google Apps

Technical Skills

- **Languages**: Java, Rust, golang, C
- **Databases**: MySQL |MariaDB, SQLite, Postgres
- **OSs**: macOS, Debian, Fedora, Windows XP - 11, Contiki
- **Tools**: Jira, git, podman/docker, kubernetes, xen (xcp-ng), VMware (Fusion, Workstation, ESXi), VirtualBox, bash, gradle

Extra Curricular

- Hobby coder
- Coding-as-a-craft wizard
- Home lab (as in linux server) owner
- Snowboarder
- Hacker Newsie
- Avid reader of science (non-)fiction
- Researches... pretty much everything to do with technology and medicine
